

SPORT INSTALL LLC

Sport-Install, LLC is a nationwide professional company specializing in synthetic turf maintenance, advanced in-fill and in-fill removal procedures for turf, and athletic field renovation and repair. Since 2004, we have focused on working with manufacturers, owners, and facilities managers to protect their investment and to maximize the performance and long-term playability of their synthetic turf surfaces.

Sport-Install offers a wide range of synthetic turf maintenance and repair services utilizing state-of-the-art SMG equipment. Our synthetic turf “SportChamp Field Maintenance and Grooming” program is designed to enhance the performance and extend the life of the system through a series of processes including; field cleaning, in-fill de-compaction, and redistribution of the existing in-fill material. For fields low in in-fill we utilize highly advanced SMG Sandmatic in-fill machines to add a uniform layer of in-fill up to the required depth. We also offer Sandmatic in-fill service for new field installations which provides uniform in-fill level while minimizing the trapping of fibers and premature fiber wear associated with other in-filling methods. Additionally, we offer repair services for all types of synthetic turf and pad systems in conjunction with our annual grooming service. Our highly experienced installation technicians are conveniently located throughout the United States. Sport-Install’s dedicated staff includes several members with more than twenty-five years experience within the synthetic turf/track industry and a cumulative experience total in excess of 125 years of service. Including our regional affiliates, we exceed 200 years turf and track experience.

Sport-Install continues to lead the way in maintenance innovation with our SMG Renomatic in-fill removal system, our cleaning program for non-filled synthetic surfaces, and application of Bac-Shield™ antimicrobial spray for synthetic turf fields. Bac-Shield™ is a product which inhibits the growth and reproduction of odor causing bacteria, fungi, mold and mildew. For more information on these or any Sport-Install services, please contact us today or visit our web site at www.sport-install.com.

Let Sport-Install assist you in achieving and maintaining maximum consistency and performance from your synthetic turf system. We’ll be there when you need us.
